

How to Use the Conversion Tools

1. Install the conversion tool, “PMP TRANSCODING“ icon will appear on desktop.

2. Double click the icon and the following dialogue block will appear.

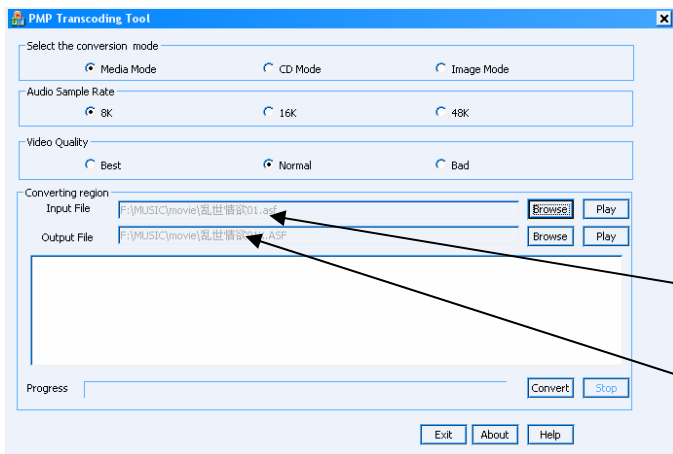

- 1. Select “Media Mode”
- 2. Select sample music frequency 8K、16K during conversion. PMP should play according to selected frequency

3. Select out sample video quality

4. Select source file

5. Select output file path and create file name. E.g. DVD001.ASF, make sure file name is created and its extended file name is ASF

3. Select ‘Convert’ to start converting, the following dialogue block will appear:

Source file path

Converted output file path

4. After you have finish converting, press “Stop“, then press “exit”.
